

# 808 OVERDRIVE PRO MANUAL

# 808 OVERDRIVE PRO

Congratulations on choosing  
**NA 808 OVERDRIVE PRO PEDAL**

This plugin faithfully reproduces the behavior and character of a famous “Screamer” green stomp box.

## OPERATION

- 1 - **LED**: Indicator come on when effect is ON.
- 2 - **DRIVE**:: Adjust the amount of distortion.
- 3 - **LEVEL**: Controls the level of the distorted signal
- 4 - **TONE**: Controls the amount of high frequency contour.
- 5 - **STOMP SWITCH** : Turns effect ON/OFF

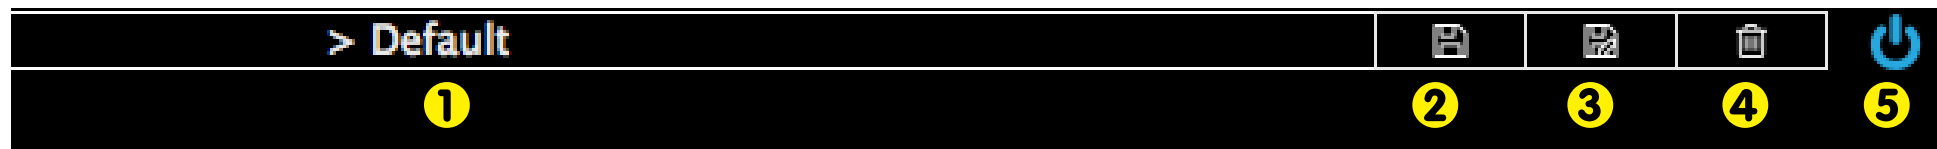

## THE TOOLBARS

### Top Toolbar

- 1 - Open the manual and the information about the plugin.
- 2 - + and - buttons allow you to scroll through the presets.
- 3 - Undo/Redo changes made to the parameters of the plugin at any time.
- 4 - With A/B banks, it is possible to compare two different settings in an easy way. It is also possible to compare presets by loading them in the two different A/B banks. The red highlight will show the currently selected bank and what you will modify/save.
- 5 - Copy the settings from a bank to another, so you can make slight changes to the controls and compare the two settings for example.

# 808 OVERDRIVE PRO

- 1 - Shows you the active preset. Click on the label to see the preset list.
- 2 - Allow you to override the current selected preset.
- 3 - Save the current selected preset as a new preset with a name of your choice.
- 4 - Delete the selected preset.
- 5 - Bypass the plugin in order to compare your processed and unprocessed signal.
